INSTALLATION GUIDANCE

KIDS Ceramic WC with Floor Discharge

B&M SKU: **ID10306** Idral code: **10306**

Installation sequence

1. Confirm the exact product and connection arrangement against the official Idral technical drawing before work begins.
2. Installation must be completed by a competent sanitary installer on a structurally suitable substrate, using appropriate fixings and seals.
3. Position the pan level, connect the specified discharge and flushing system, then secure without over-tightening the ceramic.
4. Complete all joints, allow sealants to cure, test several flush cycles and check for movement or leakage before use.
5. WC seat/cover, flushing system, fixings and connection parts are not included unless expressly stated in the order.

Important

Compatible seats: ID11306 red/yellow or ID11306B white. Seat and cover are selected and sold separately. The official technical specification remains the controlling dimensional reference.
