

CARE & MAINTENANCE

Antequera Wall-Hung Bidet | Product code: BAT4569

Routine cleaning

- 1 Rinse after use and clean the glazed porcelain regularly with warm water, a soft cloth or non-scratch sponge, and a mild pH-neutral bathroom cleaner.
- 2 Rinse thoroughly so no cleaner remains around the tap hole, overflow or waste outlet, then wipe dry to reduce water marks and deposits.
- 3 Clean the selected tap, waste and overflow components according to their manufacturers' instructions.

Avoid

- 1 Abrasive powders, scouring pads, wire wool, solvents, strong acids or alkalis, and unsuitable chemicals.
- 2 Mixing bleach, descaler, acid cleaners or other cleaning products; dangerous fumes can result.
- 3 Heavy impact, dropped objects, boiling water and sudden extreme temperature changes.

Ongoing checks

Inspect silicone joints, wall fixings, the tap, waste, trap and water connections regularly. Repair movement, failed sealant or leaks immediately. Follow the concealed support-frame manufacturer's maintenance instructions.

**SOLD
SEPARATELY**

Support frame, tap or mixer, waste, trap, installation materials and plumbing connections are sold separately unless expressly included in the order.
