

INSTALLATION INSTRUCTIONS

Antequera Wall-Hung Bidet | Product code: BAT4569

Before you begin

Installation must be completed by a competent installer in accordance with local building and plumbing requirements. Inspect the WC and compare it with the current technical specification before fitting. Do not install a damaged product.

Confirm the installation

This wall-hung bidet requires a compatible concealed support frame. The supporting system—not the finished wall surface—must carry the full design load. Confirm the frame rating, tap supply, waste and trap positions, finished wall build-up and 500 x 360 x 325 mm dimensions before installation.

- 1 Select the system. Confirm the support frame, mounting hardware, tap or mixer, waste and trap are mutually compatible and suitable for the wall construction.
- 2 Install the frame. Fix, plumb and level it to suitable structural floor and wall elements in accordance with the frame manufacturer's instructions.
- 3 Set services and projections. Position hot and cold supplies where applicable, the waste connector and mounting studs for the completed wall thickness and Bathco technical specification.
- 4 Complete and inspect the wall. Pressure-test the water services and confirm drainage before closing the wall; retain any required service access.
- 5 Fit the bidet. Protect the porcelain, install the selected tap and waste, trim connection pipes accurately and slide the bidet evenly onto the studs without forcing it.
- 6 Secure and seal. Tighten fixings evenly to the system manufacturer's guidance and apply neutral-cure sanitary silicone at the wall junction, leaving any required drainage gap.
- 7 Commission. Run water, check drainage and overflow operation, inspect every connection for leaks and confirm stable mounting.

SOLD SEPARATELY

Compatible support frame, tap or mixer, waste, trap, connection components, installation fixings, sealants and plumbing connections are sold separately unless expressly included in the order.

These instructions provide general guidance. The current Bathco technical specification and the instructions for every selected installation system take precedence.
