

CARE & MAINTENANCE

New Cuenca Natural | Product code: BAT4033B/CRU

Routine cleaning

- 1 Rinse with clean water after use.
- 2 Clean with a soft cloth or non-scratch sponge, lukewarm water and a small amount of pH-neutral soap.
- 3 Rinse thoroughly and dry with a clean soft cloth.

Natural porcelain has a tactile finish: remove coloured liquids and cosmetic residues promptly and test any cleaner first on an inconspicuous area.

Avoid

- 1 Abrasive powders, scouring pads, wire wool and gritty cleaners.
- 2 Strong acids or alkalis, bleach, solvents, drain cleaner and paint removers.
- 3 Heavy impact, dropped objects, boiling water and sudden extreme temperature changes.

Ongoing checks

Inspect silicone seals and plumbing regularly. Repair failed sealant, movement or leaks promptly. Follow material-specific instructions for separately purchased taps, wastes and siphons.

IMPORTANT

Tap or mixer, basin waste, siphon/trap, fixings, sealants and plumbing components are sold separately unless expressly included in the order.
